# INFINITE POSSIBILITIES: A SCI-FI SHOW (WITH HARDLY ANY SCIENCE)

## NTH WORLD PROBLEMS

"Infinite Possibilities" is a TV show competing in the Comedy Coup and is about Charlie and Glenn, two guys with not a whole lot going on. That's until they meet a magical (if a little lazy) witch named Simone. With the help of an enchanted turntable, the gang will travel to new and dangerous alternate worlds. They will encounter mysterious creatures and bizarre situations with infinite possibilities!

## WHAT IS COMEDY COUP?

Comedy Coup is a disruptive studio that accelerates comedy creators towards development and production opportunities for their original show concepts. They develop and advance on Comedy Coup's fan-fueled social web platform over a 10-week period when a selected project works with Comedy Coup producers to deliver, market and broadcast a half-hour comedy special for CBC prime time by Fall 2015.

## WHAT IS CANADA SAYING?
